- ◆ RJ-45 10/100 Base-T
- ◆ USB
- ◆ Extended runtime model
- ◆ Rack Height 2 U

* Alternatively software can be purchased separately

UPSStat for Alpha/VAX VMS systems is an **all-in-one UPS solution** which will allow your Alpha or VAX system to shutdown safely in the event of a power outage. In the event of a power outage, UPSStat detects the power left reaching a pre-defined level and initiates a safe shutdown process to ensure no loss of data

and the fastest possible restart once power is restored. UPSStat is configured to shut down your Alpha/VAX emulator prior to the shutdown of the rest of your Windows processes. Without this protection, Alpha and VAX users may face corrupted files and a slower restart when the system is restarted.

Features

- ◆ UPSStat Alpha/VAX Shutdown CD and Windows shutdown CD
- ◆ Installation guide
- ◆ Rack mounting brackets and rack mounting support rails
- ◆ APC Smart Signaling RS-232 cable (P/N 940-0024)
- ◆ APC Simple Signaling RS-232 cable (P/N 940-0020)
- ◆ USB cable
- ◆ User manual
- ◆ Web/SNMP management card
- ◆ Up to 4 hours of phone support for installation and configuration
- ◆ Includes 3000 VA APC UPS
